Description

High Performance

The HyperGain® Model HGV-2406U is an economical yet high performance Omni-directional WiFi antenna designed for the 2.4GHz ISM band. These compact and lightweight antennas are ideally suited for IEEE 802.11b and 802.11g wireless LANs, Bluetooth, public wireless hotspot application and other multipoint applications where wide coverage is desired.

Versatile and Economical

This antenna features an integral N-Female bulkhead type connector that mounts through the wall of an equipment enclosure. Included with the HGV-2406U is a mast mounting kit. Consisting of a heavy-duty steel bracket and a pair of U-bolts, this kit allows installation on masts up to 2.0" in diameter.

All Weather Operation

Constructed for all weather operation, the HGV-2406U features sealed collinear brass elements inside a durable UV-stable machine gray fiberglass radome. A vented end cap and drain holes in the base help prevent moisture build-up inside the antenna. These features allow the HGV-2406U to be mounted in up or down positions.
